

PROBLEM/CHALLENGE

Unit Training Managers need a consolidated training system to inform servicemembers when they are due for training to improve mission readiness and track career progression

Trainings are tracked across multiple systems, but data isn't consolidated or user-friendly, making manager tracking very difficult and data being skewed.

Training Operations

IMPACT

A solution would improve training management, improve mission readiness, and ensure airmen are consistently certified for deployment and career advancements.

Trainings Requirements

- Air Force Ancillary Trainings – see slide 4
 - Group trainings required for all members
 - Each training states if it can be done online or in a group setting
- Air Force Individual Job Trainings / Initial Skill Level Focus – see slide 5
 - Individual trainings required by their Air Force Specialty Code (AFSC)
- Air Force Individual Job Trainings / Recurring Skill Level Focus - Comprehensive Medical Readiness Training (CMRP) – see slide 6
 - Individual trainings required by their Air Force Specialty Code (AFSC) – aka. Job (medic, nurse, etc)
- Army Trainings (Individual Training Readiness Matrix (ITRM) – see slide 7
 - Group trainings required
- Army Trainings (Individual Training Readiness Matrix (ITRM) – see slide 8
 - Individual trainings required by their Air Force Specialty Code (AFSC) – aka. Job (medic, nurse, etc)

Training Systems used today

- Medical Readiness Decision Support System (MRDSS)
- MyLearning
 - New platform launched in 2022
 - Tracks group and individual trainings on an Air Force Scope
 - Ancillary
 - Individual Skill Training
- ARCNET
 - Tracks Air National Guard / Air Reserve focused trainings on an Air Force Scope
- ITRM Excel Tracker

Medical Readiness Decision Support System (MRDSS)

MRDSS is an automated information system on the Global Information Grid used by the Air Force medical Services to manage readiness information in direct support of active Air Force units, Air National Guard, and Air Force Reserves, at fixed bases, and deployed locations during both peace and wartime operations.

- Specifically used for medical units.
- Has reporting capabilities
- Can track Army group/individual trainings
- It currently does not talk to ARCNET or myLearning
- MRDSS Helpdesk can assist with adding/removing trainings
 - Consider working with them on tailoring reports to capture trainings due

The screenshot displays the MRDSS web application interface. At the top is a blue navigation bar with the MRDSS logo on the left and a series of menu items: Capability, Deployments, Deployment Certification, Personnel, Training, CMRP, Tools, MRL, Sit Awareness, SABC, FTMS, and Logout. On the right side of the bar is the MRDSS Helpdesk contact information. Below the navigation bar, the user's session information is shown: MAJCOM: ANG, UNIT: 164 - CERF WHEELER AAF, and Last Login: 15 SEP 2022 15:15:13. A notification for 1119 MRDSS messages is also present. The main content area is titled 'Reports' and is divided into two sections: 'Queued Reports' and 'Completed Reports'. The 'Queued Reports' section is currently empty. The 'Completed Reports' section shows a single report: 'Education and Training Completion - by Tra...' with a completion time of 15 SEP 2022 15:18:15. Below these sections, there is a 'Select a MRDSS report' section with a 'Category' dropdown menu and a 'Report' list. The 'Category' dropdown is set to 'Education and Training'. The 'Report' list includes several options, with 'Education and Training Completion by Training Event' selected. At the bottom of the page, there is a 'Report Description' section showing 'Report No. Unit-1024, Updated 25 MAR 2019.'

Report Description

Report No. Unit-1024, Updated 25 MAR 2019.

Air Force myLearning

The learning management system launched in 2021 is part of Air Education and Training Command's efforts to aggressively and cost-effectively modernize education and training to develop the Airmen we need.

Air Reserve Component Network (ARCNet)

Air Reserve Component Network (ARCNet) offers a series of tools for Reservists and Guardsmen, and the people who manage them. The ARCNet application grows almost monthly, giving military leadership the most up-to-date information, while simplifying management of people and programs. Security features through the AF Portal ensure the ARCNet system data maintains the highest caliber of protection on sensitive unit and individual data. Included in the ARCNet tool box are Information and Communications tools, Readiness Reporting Dashboards, Ancillary Training Management, Duty Planning and Participation Management, Volunteerism or job searching and application tools.
